

# E3 Series

AC Variable Speed Drive

General Purpose Drive
Easy control for all motor types

0.5HP-50HP / 0.37kW-37kW 110-480V Single & 3 Phase Input

**NEMA 4X** (IP66)

### **Easy to Use**

### **General Purpose Drive**

Focused on ease of use, E3 Series drives provide unrivalled simplicity of installation, connection and commissioning, allowing the user to benefit from precise motor control and energy savings within minutes.

### **Simple Commissioning**

With just 14 basic parameters and application macro functions providing rapid set up, the E3 Series minimizes start-up time.

### **Intuitive Keypad Control**

Precise digital control at the touch of a button.

#### **Application Macros**

Switch between **Industrial, Pump & Fan** modes to optimize E3 Series drives for your application.

Industrial | Pump | Fan

See Page 6

### All E3 Series drives are drive.web ready

**drive.web** uses distributed control over Ethernet to provide cost effective, high performance integration of drives and controls in systems of any size or complexity.

### **NEMA 4X** (IP66)

### Up to 30HP

- ✓ Outdoor rated
- ✓ Dust-tight
- ✓ Washdown ready

### **Key Features**

- ✓ Internal PI control
- ✓ Dynamic brake switch (Frame 2 and up)
- ✓ Dual analogue inputs
- ✓ Operates up to 50°C
- ✓ Optional Internal Category C1 EMC filter
- ✓ Option for control of single phase motors (see **Page 8**)

### **Modbus** RTU

CAN

on-board as standard

# 

# Sensorless Vector Control for all Motor Types

Precise and reliable control for IE2, IE3, & IE4 motors

**IP20** 

Up to 50HP

Compact, robust and reliable general purpose drive for panel mounting

### Incredibly Easy to Use

- ✓ Built in PI control
- ✓ Dynamic brake switch (Frame 2 and up)
- ✓ Application macros for industrial, fan and pump operation
- ✓ Bluetooth connectivity
- ✓ Optional EMC filter (C1)

### **Controls Multiple Motor Types**

- ✓ IE2, 3, & 4
- ✓ IM, PM, BLDC and SynRM

5 sizes cover global supply ratings

E3 Series drives provide precise motor control and energy savings using the factory settings. Simply power up and the drive can immediately deliver energy savings.

Simple Installation DIN rail and keyhole mounting options

14 basic parameters allow simple adjustment for your application if required, with up to 50 parameters available in total for a highly flexible performance.

### **NEMA 4X** Outdoor

Up to 30HP

**Coated Heatsink as Standard** 

Ideal for hygiene based operations requiring washdown — such as food and beverage

Outdoor rated enclosed drives for direct machine mounting, dust tight and ready for washdown duty

2 x RJ45 ports
eliminate the need for a splitter.

2 Easily accessible EMC disconnect

Bardac

3 Easy to wire

due to the large, accessible chamber and removeable gland plate.

### **Locally Customizable**

Flat front to terminal cover with mounting points for switches and an internal PCB.

Switched or non-switched

### Please Inquire about our new SunShade

While, your NEMA 4X E3 drive is ultra violet (UV) resistant; a SunShade can go a long way to keep the elements at bay.

### NEMA 4X (IP66) outdoor rated

Built with tough polycarbonate plastics specifically chosen to withstand degredation by ultra violet (UV), greases, oils and acids. Also robust enough not to be brittle at

### Washdown Ready

With a sealed ABS enclosure and corrosion resistant heatsink, E3 Series NEMA 4X drives are ideal for high-pressure washdown applications.

### **Dust-Tight Design**

Conformal coating

as standard

Install directly on your processing equipment and be sure of protection from dust and contaminants.

### **Switched Models**

Simply wire up the drive, turn the inbuilt potentiometer and the motor will start running – allowing immediate energy savings.

Saving energy cannot be easier than this!

Run Forward Switch

Lockable Mains Disconnect / Isolator

### **Application Macros**

Switch modes at the touch of a button to optimize E3 Series drives for your application

Single parameter application macro selection

#### **Industrial Mode**

**Industrial Mode** optimizes E3 Series drives for load characteristics of typical industrial applications.

#### Applications include:

- ✓ Conveyors
- ✓ Mixers
  - Treadmills

**Sensorless Vector** provides high starting torque and excellent speed regulation

#### IP20

panel mount units or

#### **NEMA 4X**

for direct machine

mounting

Rapid parameter cloning using **T3-STICK** 

### **Pump Mode**

**Pump Mode** makes energy efficient pump control easier than ever.

#### Applications include:

- ✓ Dosing Pumps
- ✓ Borehole Pumps
- ✓ Transfer Pumps
- ✓ Swimming Pools
- ✓ Spas
- √ Fountains
- Constant or variable torque
- Internal PI control

### Fan Mode

**Fan Mode** (inc. fire operation) makes air handling a breeze, ideal for simple HVAC systems.

#### Applications include:

- ✓ Air Handling Units
- √ Ventilation Fans
- ✓ Circulating Fans
- ✓ Air Curtains
- ✓ Kitchen Extract

- High efficiency variable torque motor control
- Flying start capability
- Mains loss ride through
- PI control

### **Instant Power Savings**

The graph below shows the incredible efficiency of the E3 Series for controlling airflow compared to traditional damper control methods.

# *Modbus* RTU

on-board as standard

### How much energy could you save?

Estimate potential energy savings,  ${\rm CO}_2$  emissions and financial savings for your application with the Bardac Drives **Energy Savings Calculator** tool.

For Single Phase Motors

**IP20** 

**NEMA 4X** (IP66)

Up to 1.5HP

### Single Phase Motor Control for PSC & Shaded-Pole Motors

### **Key Features**

- ✓ 110-115V and 200-240V models
- √ Small mechanical envelope
- ✓ Rugged industrial operation
- ✓ Fast setup, and simple operation with 14 basic parameters
- Unique motor control strategy optimized for single phase motors
- ✓ Motor current and rpm indication
- ✓ Built in PI control
- ✓ Dynamic brake switch (Frame 2 and up)
- ✓ Application macros for industrial, fan and pump operation
- ✓ Optional EMC filter (C1)

# Modbus RTU CAN

on-board as standard

150% overload for 60 secs (175% for 2 secs)

Simple airflow control

### Dedicated to Single Phase Motor Control

Designed to be cost effective and easy to use, the E3 Series for Single Phase Motors is for use with PSC (Permanent Split Capacitor) or Shaded-Pole Single Phase induction motors. Only for use in variable torque applications such as pumps and fans.

The E3 Series for Single Phase Motors uses a revolutionary motor control strategy to achieve reliable intelligent starting of single phase motors.

- Removes the need for 3 phase supply wiring
- Provides the same performance features as the 3 phase E3 Series
- The ideal energy saving solution where high starting torque is not required

   typically including fans, blowers, centrifugal pumps, fume extractors and air flow controllers

### **Special Boost Phase**

To ensure reliable starting of single phase motors, the drive initially ramps the motor voltage up to rated voltage while maintaining a fixed starting frequency, before reducing the frequency and voltage to the desired operating point.

# driv∈.w∈b automation

drive.web uses distributed control over Ethernet to provide cost effective, high performance integration of drives and controls in systems of any size or complexity.

# **SMARTY dw240 series** controllers with a wide range of I/O

Used for all programmable control, peer-to-peer Ethernet networking and system integration tasks.

- DIN mount controllers with flexible analog, logic, and encoder I/O
- 51 points of high resolution
- Includes gateway to ModbusTCP/IP, ModbusRTU, EIP/PCCC, etc.
- USB port for easy system-wide programming

# **SMarty** dw210 series controllers with a wide range of I/O

Used for all programmable control, peer-to-peer Ethernet networking and system integration tasks.

- DIN mount controllers with flexible analog, logic, and encoder I/O
- 16 points of high resolution I/O
- Includes gateway to ModbusTCP/IP, ModbusRTU, EIP/PCCC, etc.
- USB port for easy system-wide programming

# **SPEEdy**miniature, full-featured controllers

Tiny, full-featured, programmable controllers for embedding into drives, sensors, HMIs, etc.

- The easiest, affordable way to get all your drives & devices up onto peer-topeer Ethernet
- Includes gateway to ModbusTCP/IP, ModbusRTU, EIP/PCCC, etc.
- USB port for easy system-wide programming

### **Installation & Peripheral Options**

A range of external EMC Filters, Brake Resistors, Input Chokes and Output Filters are available, to suit all installation requirements

### savvy

the smart automation tool

Smart, intuitive graphical tools for device programming, system design, and monitoring.

### savvyPanel

smart, touch screen operator station technology

Provides unprecedented flexibility in instrumentation, control, and monitoring.

Available on iOS and Android, and PC, Mac, and Linux.

### Remote Keypads

### T2-OPPAD

Remote Keypad & TFT Display

### **T2-OPPORT**

Remote Keypad & LED Display

#### **RJ45 Accessories**

Ideal for simple and fast connection of Modbus RTU/CAN networks

**T2-J4505** RJ45 Cable 0.5m **T2-J4510** RJ45 Cable 1.0m

**T2-J4530** RJ45 Cable 3.0m

T2-J45SP RS485 3 Way Data Cable

Splitter RJ45

### **Ancillary Support Products**

Communication Interfaces, Input and Output Reactors, DB resistors, EMC Filters, and Motors are available!

Please visit bardac.com or call 1-888-667-7333

### E3 Series - AC Variable Speed Drive

### Low Power Applications

Dedicated to low power applications, E3 Series drives combine innovative technology, reliability, robustness and ease of use in a range of compact IP20 & NEMA 4X enclosures.

### **Simple Commissioning**

14 parameter basic setup. Default settings suitable for most applications. Contactor style connection for simple wiring.

#### E3 Series NEMA 4X

Environmentally protected, NEMA 4X rated models can be mounted directly on your processing equipment.

#### Washdown Ready

With a sealed ABS enclosure and corrosion resistant heatsink, E3 Series NEMA 4X models are ideal for high-pressure washdown applications.

#### **On-drive Control**

NEMA 4X models feature optional, convenient controls for speed control, REV/OFF/FWD and Power ON/OFF, complete with safety lock.

#### Single Phase Motor Control

E3 Series drives for Single Phase Motors provides accurate speed control of single phase PSC or shaded pole motors. Special boost phase ensures reliable starting, initially ramping the motor voltage up to rated voltage while maintaining a fixed starting frequency, before reducing the frequency and voltage to the desired operating point.

### About Bardac Drives

Since our founding in 1992, Bardac has worked hard to build our reputation around key goals:

- Innovative technologies
- Reliable products
- Focus on automation; Distributed Control, AC Drives, DC Drives, and Motors
- All catalog items normally in stock
- Competitive pricing
- Unrelenting customer support

For more about the E3 Series:

bardac.com/e3-series/
