universal Automation Controller

Turns almost
anything
into a smart
device

Only $\frac{3}{4}$ " x $\frac{7}{8}$ " x $1\frac{3}{8}$ " - 21 x 22 x 36mm

fits anywhere • does everything

- very small
- very smart
- very fast
- very easy
- very affordable
- Easily embed in drives & devices for distributed control over Ethernet
- Use stand alone to coordinate multiple drives & HMI's
- Add all the distributed i/o you need
- USB port for easy system wide access
- Internet access for smart enterprise integration

automation for drives & systems

drive.web.com

speedy

smart systems integration

speedy Universal Automation Controllers improve the performance of any drive in a system by:

- eliminating the typical multi-drop RS485 network saturation problems.
- off-loading outer loop tasks to reduce the drive interface communications traffic.
- providing all programmable control and drive coordination functions locally thereby eliminating the latency delays and bandwidth limitations of a shared remote PLC.

drive.web distributed control

The innovative **drive.web** technology uses distributed control over Ethernet to provide cost effective, high performance integration for drives in systems of any size or complexity. The **drive.web** technology eliminates the need for a PLC or supervisory computer.

Intuitive **savvy** configuration tools incorporate dynamic, graphical function block programming, drag & drop connections, powerful navigation features and self-documenting signal flow diagrams.

Universal Automation Controller

***the fast lane
... keep up - see where it leads!***

logic • math • process • coordination • winders • printing
indexing • solar • temperature • position • registration

speedy

- Peer to peer control over Ethernet
- Stand alone or parallel processing
- Unlimited system expansion
- Easy interface to almost any drive
- Build systems from function blocks
- Make easy drag & drop connections
- Add remote i/o
- Create smart touch screen controls
- Provide Internet access
- *savvy* graphical programming tools
- Interface to ModbusTCP or EIP

Installation Options:

- RJ45 connector
- DIN mount with screw terminals
- Embedded component

Interface Options:

- 100baseTX Ethernet
- USB for system wide programming
- EIA485, 500KBPS serial port

Precision:

- 16 bit integer basic arithmetic
- 32 bit floating point calculator functions

universal automation controller
the biggest thing in automation!

... but very small
only $\frac{3}{4}$ " x $\frac{7}{8}$ " x $1\frac{3}{8}$ " (21x22x36mm)

- 100baseTX Ethernet port for:
drive.web distributed control
ModbusTCP/IP
EIP/PCCC
- USB port for easy system programming & control
- Fast interface port for drives & devices
(ModbusRTU or dedicated CANopen)
- Seamless integration of drives, controls & HMIs
- Intuitive savvy graphical programming tools
- Clear signal flow diagram documentation
- Powerful system navigation tools

speedy universal Automation Controllers are part of the homogeneous *drive.web* distributed control family:

savvy - intuitive design & documentation tools

savvyPanel - smart touch screen & iOS technology

speedy - embedded controllers for drives & devices

drive.web, smarty, savvy, savvyPanel and speedy are trademarks of Bardac Corporation
